With iPhone X, the device is the display. An all-new 5.8-inch Super Retina screen fills the hand and dazzles the eyes. The display employs new techniques and technology to precisely follow the curves of the design, all the way to the elegantly rounded corners. The most durable glass ever in an iPhone, front and back. Surgical-grade stainless steel. Wireless charging. Water and dust resistance. The first OLED screen that rises to the standards of iPhone, with accurate, stunning colours, true blacks, high brightness, and a 1,000,000 to 1 contrast ratio.

Available space is less and varies due to many factors. A standard configuration uses approximately 8GB to 11GB of space (including iOS and pre-installed apps) depending on the model and settings. Pre-installed apps use about 4GB, and you can delete these apps and restore them. Size and weight vary by configuration and manufacturing process. iPhone X is splash, water and dust resistant, and was tested under controlled laboratory conditions with a rating of IP67 under IEC standard 60529. Splash, water and dust resistance are not permanent conditions and resistance might decrease as a result of normal wear. Do not attempt to charge a wet iPhone; refer to the user guide for cleaning and drying instructions. Liquid damage not covered under warranty. Testing conducted by Apple in August 2017 using pre-production iPhone X units and software and accessory Apple USB-C Power Adapters (29W Model A1540, 61W Model A1718, 87W Model A1719). Fast-charge testing conducted with drained iPhone units. Charge time varies with environmental factors; actual results will vary. Compatible wireless charging mats sold separately.
